PROFESSIONAL EXPERIENCE

Shanghai Cocafe Technology Co Ltd.   2022.02 - 2023.07

Front-end leader/Full stack developer   Shanghai, China

- Developed a React/Javascript H5 wallet application featuring AR display, payments, poster collection, AI chat, settings, and random NFT generation on the Ethereum blockchain, supporting over 1 million users.
  Led the creation of a SaaS system for standardizing NFT sales websites using Next.js,solidity,Ruby, Rails, PostgreSQL, MongoDB, Redis,Nest.js,Rust, and Node.js, including features like user registration, template generation, and custom domains.
  Built a UI library from scratch, reducing development time by 80%, established a private npm repository, and set up an auto-updating documentation site.
  Assisted prominent clients like Porsche and UnionPay in launching their NFT sales platforms in the Chinese market, reaching a combined user base of over one million.

Shanghai Tezign Technology Co Ltd.   2021.08 - 2022.01

Senior Front-end developer   Shanghai, China

- Utilized React for key development tasks, independently managing modules for user logs and shopping carts.
- Collaborated with the company's internal customer service system for enhancement.
- As part of the technical solution team, delivered custom development for clients, enabling one-click releases on platforms like Douyin and WeChat official accounts, along with crucial bug fixes.

Shanghai WangFanXin Technology Co Ltd.   2021.03 - 2021.07

Senior Front-end developer   Shanghai, China

- Employed React / Antd-pro as foundational front-end frameworks, and utilized TypeScript and DVA.js for developing the data visualization portion of the platform, fulfilling data mining tasks, independent function completion, and ensuing maintenance duties.
- Integrated SVG / D3.JS for restoring UI design within the project, creating high-degree-of-freedom interactive function charts.

Suzhou EPAM Technology Co Ltd.   2019.10 - 2021.03

Junior Front-end developer   Suzhou, China

- Leveraged React as a fundamental front-end framework, and employed JavaScript/Redux for the construction of front-end pages, ensuring independent function completion and ongoing maintenance tasks.
- Developed an iPad side application utilizing React Native.
- Crafted iOS and Android mobile applications using Dart/Flutter.

SpeedHome Co Ltd.   2019.03 - 2019.10

Junior Full-stack developer   Kuala Lumpur, Malaysia

- Utilized SpringBoot, Java, and Maven technologies for modifying, creating, deleting, and debugging web pages.
- Employed HTML, CSS, and JavaScript for front-end webpage development. Responsible for maintaining, creating, and debugging API interfaces, using Postman for testing, or drafting API test cases when required.
- Undertook functionality tests for existing projects, conducted bug identification and executed necessary fixes.
